Summary

Skilled AI/GenAI engineer with hands-on expertise in building **RAG pipelines**, **agentic AI systems**, and **full-stack LLM applications** using tools like Python, LangChain, LangGraph, and FastAPI.

Experience applying NLP and LLM-based techniques to real financial datasets, with hands-on exposure to vector databases, prompt engineering, and containerized deployment.

Eager to contribute to data-driven GenAI and agentic AI roles while continuously advancing skills in machine learning and production AI systems.

Technical Proficiencies

Languages & Frameworks: Python, C++, Java, C, FastAPI, Flask

GenAI & Agentic Systems: LLMs (OpenAI, Google Gemini, Groq/Llama, Mistral), RAG, LangChain, LangGraph, Multi-Agent Systems, Prompt Engineering, Embeddings, Semantic Search

Vector Databases & Storage: ChromaDB, Pinecone, FAISS, PostgreSQL, SQL

Cloud & MLOps: Docker, Kubernetes, AWS (EC2, ECR), CI/CD, Hugging Face

Machine Learning: Scikit-learn, Pandas, NumPy, Model Training & Evaluation, Feature Engineering

Core CS Fundamentals: DBMS, Computer Networks (CN), Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPS)

Work Experience

Bluestock Fintech — AI Engineer (Remote)

April 2026 – June 2026

- Analyzed **50K+ financial text records** using NLP techniques to surface patterns that directly supported stock and IPO research workflows.
- Designed and deployed **LLM-powered prompt-engineering pipelines** to extract structured insights from unstructured market news, streamlining the manual review process for the research team.
- Built internal AI-powered summarization tools that translated complex financial reports into clear, plain-language briefs for non-technical stakeholders.
- Structured and organized a **25K+ record financial dataset** to enable retrieval-based (RAG) experimentation across downstream GenAI use cases.

Projects

NexoraAI | [GitHub](#) | [Live Demo](#)

Aug 2026

- Built a full-stack agentic chatbot (**FastAPI**, **LangGraph**, **Jinja2**) with JWT auth, real-time SSE streaming, document uploads, and per-user conversation history with pin/share links.
- Combined **RAG (ChromaDB)**, Tavily web search, calculator, and long-term memory, with mid-chat switching across **Gemini**, **Groq (Llama)**, and **Mistral**.
- Containerized the app with **Docker** and deployed it on Render using a Blueprint (`render.yaml`) with env-based config.

AI Meeting Assistant | [GitHub](#) | [Live Demo](#)

July 2026

- Built a full-stack AI meeting assistant that converts YouTube videos and audio files into transcripts, summaries, action items, and key decisions using **Python**, **Flask**, **OpenAI Whisper**, **LangChain**, and **Groq LLM**.
- Added AI-based Q&A over meeting content, searchable transcripts, and user login with personal meeting history using **ChromaDB** and **SQLite**.
- Delivered export in **4 formats** (TXT, Markdown, JSON, PDF) and shipped a ready-to-use app containerized with Docker and Gunicorn.

Ticket Categorizer | [GitHub](#) | [Live Demo](#)

Dec 2025

- Built an end-to-end ML pipeline (data ingestion, text preprocessing, training, evaluation, inference) that classifies support tickets into Billing, Technical, HR, or General using Scikit-learn and TF-IDF.
- Trained and compared Naive Bayes vs. Logistic Regression, achieving **~70–80% holdout accuracy**; added confidence scoring, <60% human-review routing, and urgent/normal priority tagging.
- Deployed a real-time Flask triage web app with Docker, hosted on Render.

Education

Chandigarh University | **Bachelor of Computer Science Engineering** | CGPA: 7.9/10

Aug 2023 – May 2027

Atam Vidya Mandir Senior Secondary School | **Higher Secondary Education (Class XII)** | CGPA: 8.3/10

2023

Achievements

150+ DSA Problems Solved: Solved 150+ Data Structures & Algorithms problems on LeetCode and other coding platforms.

Hackathon Finalist (2025): IIT Indore Hackathon (FLUXOS) — [Certificate](#)

Advanced Python Certification: LinkedIn Learning — [Certificate](#)

Google Cloud Agentic AI Day (2025): Certificate of Participation, powered by Hack2skill — [Certificate](#)
